**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Teresa Wong on March 26, 2008.

The application has been amended as follows:

In the Specification:

On page 8, lines 9-14, "A machine-readable medium includes any mechanism for storing or transmitting information in a form readable by a machine (e.g., a computer). For example, a machine-readable medium includes read only memory ("ROM"); random access memory ("RAM"); magnetic disk storage media; optical storage media; flash memory devices; electrical, optical, acoustical or other form of propagated signals (e.g., carrier waves, infrared signals, digital signals, etc.); etc." has been deleted.

***Information Disclosure Statement***

1. The information disclosure statement filed 2/22/08 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other

information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

***Allowable Subject Matter***

2. Claims 7, 9-15, 17-19, 21-25 and 27-29 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not specifically disclose the combination of limitations of claim 7: a method to determine relative movement of a pixel block from a first video frame to a second video frame, the method comprising: performing a motion measurement on a plurality of motion search points that form a rectangular search region, each of the plurality of motion search points corresponding to a pixel block; finding a minimal motion search point among the plurality of motion search points based on result of the motion measurement; performing a refinement motion search on a sub-pixel level if the minimal motion search point is within an inner region of the rectangular search region; finding a motion vector corresponding to the relative movement of the pixel block from the first video frame to the second video frame; repositioning the rectangular search region to be substantially centered on the minimal motion search point and partially overlapping a previous position of the rectangular search region while maintaining a size of the rectangular search region to be substantially the same if the minimal motion search point is along an edge or at a corner of the rectangular search region, the repositioned rectangular search region including a second plurality of motion search points; and performing a motion measurement on the second plurality of motion search points.

Independent claims 15, 19 and 25 are patentable for similar reasons as independent claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
